

Invitation to CUWB emerging scholars workshop - ISCI conference 2019 in Tartu

Dear CUWB emerging scholars,

In 2019 the International Society of Child Indicators (ISCI) conference in Tartu will host the **first CUWB emerging scholars meeting**. It will be held on August 26th and include a full day of project presentations of PhD or Postdoc projects, open space for discussion and working groups on qualitative research on child well-being and time to discuss and organize the administration of our emerging scholar network.

Our aim at the workshop in Tartu will be to take the first steps in establishing an emerging scholar network within the CUWB network. The emerging scholar network aims to provide an infrastructure for emerging scholars to develop the field of qualitative child well-being studies with a sustainable impact, thus providing a space in which to exchange ideas and develop common ideas.

The workshop in Tartu is aimed at emerging scholars who feel affiliated to the international study 'Children's Understandings of Well-being - Global and Local Contexts' and its topics.

We kindly invite emerging scholars, who are undertaking research on childhood-specific subjects as well as those using qualitative research methods or exploring the concept of well-being to join the pre-conference workshop.

Please let us know by the 30th of January 2019, if you intend on participating in the workshop-day in Tartu.

To assist us plan for the day, could you please provide the following information to stella.maerz@uni-vechta.de or lisa.fischer@tu-berlin.de:

- Your full name and Institutional association.
- Your project working title.

There will be a number of double rooms in a guesthouse which can be made available to those attending the workshop and conference. These will be very close to the conference location and made available for approximately €20-25 per night/per person.

- If you could also indicate your interest in whether you would like to reserve one of these rooms, whether on your own or willing to share. That would also be appreciated.

We are very much looking forward to the workshop and to meeting you!
Please feel free to contact us for further questions!

Best wishes,

Stella (stella.maerz@uni-vechta.de, University of Vechta, Germany) and Lisa (lisa.fischer@tu-berlin.de, Technische Universität Berlin, Germany)
